

1° Place the neveler into the legs of the culture table.

2° First, join the short side rails in the legs of the culture table, afterwards join the long sides. It is important to not squeeze the nuts completely, till the culture table is fully assembled. (before putting substratum).

3° Next, put the square base that have an edge in the shape of a "V". Then, put the second base and the red top in the height holes of the bases. For putting in place the bamboo cane kit Ref. 6002, replace the red tops with the grey cables, and then put the bamboo canes.

**WARNING:** Don't put soil in the culture table, the sustratum has to be 100% organic origin.
